REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

A search of the relevant prior art failed to uncover any prior art or combination of prior art which teach or suggest applicant's recited two-part foamed polyethylene terephthalate (PET) container, comprising an upper foamed PET part having a first integral skin and a first density, wherein the first integral skin has a first surface weight percent crystallinity, and a lower foamed PET part connected to the upper foamed PET part, wherein the lower part has a second integral skin and a second density, and wherein the second integral skin has a second surface weight percent crystallinity, and wherein the second density is greater than the first density, and wherein the second surface weight percent crystallinity is greater than the first surface weight percent crystallinity.

Kumar (US 5223545, discussed in applicant's specification) discloses a foamed PET tray with an integral skin (column 1, line 61 through column 2, lines 1-26). However, Kumar fails to disclose a lower foamed PET part connected to the upper foamed PET part, wherein the lower part has a second integral skin and a second density, and wherein the second integral skin has a second surface weight percent crystallinity, and wherein the second density is greater than the first density, and wherein the second surface weight percent crystallinity is greater than the first surface weight percent crystallinity.

Ramirez discloses a container comprising a first portion having a first density and a second portion having a second density (column 10, lines 25-35). However, Ramirez

Art Unit: 1794

fails to disclose first and second integral skins and wherein the second surface weight percent crystallinity is greater than the first surface weight percent crystallinity, foamed polyethylene terephthalate.

Neither reference discloses two integral skins and wherein the second surface weight percent crystallinity is greater than the first surface weight percent crystallinity and two polyethylene terephthalate portions have two different densities. The prior art does not suggest that these limitations are obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
